Subject Index of Volume 245

Adsorption
  electrical and structural properties of gold films and mercury-covered gold films, 215
  study of group Ib metal adsorption on iridium, 64
Aluminium
  TEM observations of early nucleation and growth stages in aluminum films on liquid gallium droplets, 260
Amorphous materials
  new amorphous molybdenum oxysulfides obtained in the form of thin films and their characterization by TEM, 34
Annealing
  interfacial reactions of thin iron films on silicon under amorphous silicon and SiO_x capping, 55

Biomaterials
  direct immobilization of antibodies on phthalocyaninato–polysiloxane photopolymers, 206
Boron
  oxidation tests of carbonaceous composite materials protected by Si–B–C CVD coatings, 86
Boron nitride
  infrared spectroscopic investigations on h-BN and mixed h/c-BN thin films, 50

Cadmium selenide
  transport and optical properties of CdSe–CdTe pseudobinary thin films, 132
Cadmium telluride
  transport and optical properties of CdSe–CdTe pseudobinary thin films, 132
Capacitors
  epitaxial BaF_2 films on InP(100) deposited by r.f. magnetron sputtering, 60
Carbon
  oxidation tests of carbonaceous composite materials protected by Si–B–C CVD coatings, 86
Ceramics
  theoretical model for the analysis of a ceramic thin film sintering on a non-sintering substrate, 109
Chemical vapour deposition
  gas-sensing properties of α-Fe_2O_3 thin films prepared by plasma-enhanced chemical vapour deposition, 225
  microcrystalline silicon carbon alloy film prepared by photo-chemical vapour deposition, 249
  mobility enhancement in a highly strained δ-doped $In_{0.9}Ga_{0.1}P/In_{0.75}Ga_{0.25}As/In_{0.53}Ga_{0.47}As/InP$ heterostructure, 164
  oxidation tests of carbonaceous composite materials protected by Si–B–C CVD coatings, 86
  rugate filters grown by plasma-enhanced chemical vapor deposition, 141
  spalling mechanism of Al_2O_3 ceramic coating coated WC–Co substrate under sliding contact, 104
Chromium
  oxidation of thin CrN and Cr_2N films analyzed via nuclear reaction analysis and Rutherford backscattering spectrometry, 4
Coatings
  cavity model of the indentation hardness of a coated substrate, 122
  friction and wear properties of electroless Ni-polytetrafluoroethylene composite coating, 98
  interface yield map of a hard coating under sliding contact, 115
  oxidation tests of carbonaceous composite materials protected by Si–B–C CVD coatings, 86
  spalling mechanism of Al_2O_3 ceramic coating coated WC–Co substrate under sliding contact, 104
Conductivity
  study of structural changes of tellurium thin films on polymer substrates by electrical measurements and transmission electron microscopy, 272
Crystllization
  microstructure, flux pinning and critical current density in $YBa_2Cu_3O_{7-\delta}$ films grown by laser ablation, 186
  recrystallization of LPCVD amorphous Si films by using F^+ implantation, 228

Deposition process
  deposition and properties of cadmium oxide films by activated reactive evaporation, 17
  laser-induced compound formation and transfer of stacked elemental layers, 40
  new amorphous molybdenum oxysulfides obtained in the form of thin films and their characterization by TEM, 34
Depth profiling
  investigation of the film formed in the borate oil immersion test, 83
Dielectrics
  epitaxial BaF_2 films on InP(100) deposited by r.f. magnetron sputtering, 60
Diffusion
  kinetic plots for predicting silicide formation sequence, 234

Elastic properties
  finite element analysis of elastic stresses in multilayered systems, 27
  theoretical model for the analysis of a ceramic thin film sintering on a non-sintering substrate, 109
Electrical properties and measurements
  deposition and properties of cadmium oxide films by activated reactive evaporation, 17
  effect of hydrogen in the selenizing atmosphere on the properties of $CuInSe_2$ thin films, 174
  electrical and structural properties of gold films and mercury-covered gold films, 215
  microcrystalline silicon carbon alloy film prepared by photo-chemical vapour deposition, 249
  origin of the inhomogeneity of electrical resistivity in magnetron-sputtered indium tin oxide thin films, 152
  peculiarities of the switching process in polycrystalline thin ferroelectric films of PZT type, 157
  transport and optical properties of CdSe–CdTe pseudobinary thin films, 132
Electron microscopy
  microstructure, flux pinning and critical current density in $YBa_2Cu_3O_{7-\delta}$ films grown by laser ablation, 186
Ellipsometry
  real time, *in-situ* ellipsometry solutions using artificial neural network, 167

Epitaxy
epitaxial BaF_2 films on InP(100) deposited by r.f. magnetron sputtering, 60

Field emission microscopy
study of group Ib metal adsorption on iridium, 64
Fluorine
recrystallization of LPCVD amorphous Si films by using F^+ implantation, 228
Fourier transform infrared spectroscopy
effect of cations on the order of saturated fatty acid monolayers at the air–water interface as determined by infrared reflection–absorption, 74

Gallium
TEM observations of early nucleation and growth stages in aluminum films on liquid gallium droplets, 260
Gallium arsenide
photoluminescence investigation of the critical thickness in InGaAs–AlGaAs pseudomorphic structures grown by molecular beam epitaxy, 267
Glow discharge
deposition and properties of cadmium oxide films by activated reactive evaporation, 17
Gold
electrical and structural properties of gold films and mercury-covered gold films, 215
Grain boundary
microstructure, flux pinning and critical current density in $YBa_2Cu_3O_{7-\delta}$ films grown by laser ablation, 186

Hardness
cavity model of the indentation hardness of a coated substrate, 122
Heat treatment
effect of hydrogen in the selenizing atmosphere on the properties of $CuInSe_2$ thin films, 174
Hydrocarbons
observation of molecular reorientations in vapor-deposited organic thin films during heat treatment by energy-dispersive total-reflection X-ray diffractometry, 44
Hydrogen
effect of hydrogen in the selenizing atmosphere on the properties of $CuInSe_2$ thin films, 174

Indium oxide
origin of the inhomogeneity of electrical resistivity in magnetron-sputtered indium tin oxide thin films, 152
Infrared spectroscopy
infrared spectroscopic investigations on h-BN and mixed h/c-BN thin films, 50
Interfaces
finite element analysis of elastic stresses in multilayered systems, 27
peculiarities of the switching process in polycrystalline thin ferroelectric films of PZT type, 157
Ion implantation
recrystallization of LPCVD amorphous Si films by using F^+ implantation, 228
Iridium
study of group Ib metal adsorption on iridium, 64
Iron
interfacial reactions of thin iron films on silicon under amorphous silicon and SiO_x capping, 55
Iron oxide
gas-sensing properties of α-Fe_2O_3 thin films prepared by plasma-enhanced chemical vapour deposition, 225
iron oxide thin film gas sensor, 211

Langmuir–Blodgett films
direct immobilization of antibodies on phthalocyaninato–polysiloxane photopolymers, 206
J-aggregates of thiadicarbocyanine dyes with fixed polymethine chain incorporated in Langmuir–Blodgett films, 191
non-linear optical characterization of Langmuir and Langmuir–Blodgett films of an amphiphilic coordination compound, 202
second harmonic generation from Langmuir–Blodgett monolayers of amphiphilic ruthenium(II) complexes: structural characterization with polarization measurements, 196
Laser ablation
laser-induced compound formation and transfer of stacked elemental layers, 40
Lead
chemical deposition of PbS from an acidic bath, 7
Luminescence
photoluminescence investigation of the critical thickness in InGaAs–AlGaAs pseudomorphic structures grown by molecular beam epitaxy, 267

Mercury
electrical and structural properties of gold films and mercury-covered gold films, 215
Metals
mobility enhancement in a highly strained δ-doped $In_{0.9}Ga_{0.1}P/In_{0.75}Ga_{0.25}As/In_{0.53}Ga_{0.47}As/InP$ heterostructure 164
Molecular beam epitaxy
photoluminescence investigation of the critical thickness in InGaAs–AlGaAs pseudomorphic structures grown by molecular beam epitaxy, 267
Molybdenum
X-ray diffraction studies of the structure of molybdenum sulphide thin films, 255
Monolayers
effect of cations on the order of saturated fatty acid monolayers at the air–water interface as determined by infrared reflection–absorption, 74
Multilayers
finite element analysis of elastic stresses in multilayered systems, 27
laser-induced compound formation and transfer of stacked elemental layers, 40

Nickel
highly oriented WSe_2 thin films prepared by selenization of evaporated WO_3, 180
real time, *in-situ* ellipsometry solutions using artificial neural network pre-processing, 167
friction and wear properties of electroless Ni-polytetrafluoroethylene composite coating, 98
Nuclear reaction analysis
oxidation of thin CrN and Cr_2N films analyzed via nuclear reaction analysis and Rutherford backscattering spectrometry, 4
Nucleation
TEM observations of early nucleation and growth stages in aluminum films on liquid gallium droplets, 260

Optical coatings
real time, *in-situ* ellipsometry solutions using artificial neural network, 167
rugate filters grown by plasma-enhanced chemical vapor deposition, 141
Optical properties
photoluminescence investigation of the critical thickness in InGaAs–AlGaAs pseudomorphic structures grown by molecular beam epitaxy, 267
chemical deposition of PbS from an acidic bath, 7
J-aggregates of thiadicarbocyanine dyes with fixed polymethine chain incorporated in Langmuir–Blodgett films, 191
optical properties of MnSe thin films, 146
real time, *in-situ* ellipsometry solutions using artificial neural network, 167
transport and optical properties of CdSe–CdTe pseudobinary thin films, 132
Organic substances
J-aggregates of thiadicarbocyanine dyes with fixed polymethine chain incorporated in Langmuir–Blodgett films, 191
mobility enhancement in a highly strained δ-doped $In_{0.9}Ga_{0.1}P/In_{0.75}Ga_{0.25}As/In_{0.53}Ga_{0.47}As/InP$ heterostructure 164
non-linear optical characterization of Langmuir and Langmuir–Blodgett films of an amphiphilic coordination compound, 202
effect of cations on the order of saturated fatty acid monolayers at the air–water interface as determined by infrared reflection–absorption spectrometry, 74
Oxidation
oxidation of thin CrN and Cr_2N films analyzed via nuclear reaction analysis and Rutherford backscattering spectrometry, 4

Phosphorus
friction and wear properties of electroless Ni-polytetrafluoroethylene composite coating, 98
Physical vapour deposition
observation of molecular reorientations in vapor-deposited organic thin films during heat treatment by energy-dispersive total-reflection X-ray diffractometry, 44
Plasma processing and deposition
gas-sensing properties of α-Fe_2O_3 thin films prepared by plasma-enhanced chemical vapour deposition, 225
peculiarities of the switching process in polycrystalline thin ferroelectric films of PZT type, 157
preparation and *in-situ* characterization of polycarbosilane thin films by d.c. plasma-enhanced deposition, 10
Polymers
preparation and *in-situ* characterization of polycarbosilane thin films by d.c. plasma-enhanced deposition, 10
study of structural changes of tellurium thin films on polymer substrates by electrical measurements and transmission electron microscopy, 272

Reaction kinetics
kinetic plots for predicting silicide formation sequence, 234
Rutherford backscattering spectroscopy
oxidation of thin CrN and Cr_2N films analyzed via nuclear reaction analysis and Rutherford backscattering spectrometry, 4

Second harmonic generation
non-linear optical characterization of Langmuir and Langmuir–Blodgett films of an amphiphilic coordination compound, 202
second harmonic generation from Langmuir–Blodgett monolayers of amphiphilic ruthenium(II) complexes: structural characterization with polarization measurements, 196
Selenides
effect of hydrogen in the selenizing atmosphere on the properties of $CuInSe_2$ thin films, 174
highly oriented WSe_2 thin films prepared by selenization of evaporated WO_3, 180
laser-induced compound formation and transfer of stacked elemental layers, 40
optical properties of MnSe thin films, 146
Semiconductors
highly oriented WSe_2 thin films prepared by selenization of evaporated WO_3, 180
Sensors
direct immobilization of antibodies on phthalocyaninato–polysiloxane photopolymers, 206
gas-sensing properties of α-Fe_2O_3 thin films prepared by plasma-enhanced chemical vapour deposition, 225
iron oxide thin film gas sensor, 211
Silane
preparation and *in-situ* characterization of polycarbosilane thin films by d.c. plasma-enhanced deposition, 10
Silicides
interfacial reactions of thin iron films on silicon under amorphous silicon and SiO_x capping, 55
kinetic plots for predicting silicide formation sequence, 234
Silicon
oxidation tests of carbonaceous composite materials protected by Si–B–C CVD coatings, 86
recrystallization of LPCVD amorphous Si films by using F^+ implantation, 228
Silicon carbide
microcrystalline silicon carbon alloy film prepared by photo-chemical vapour deposition, 249
rugate filters grown by plasma-enhanced chemical vapor deposition, 141
Silicon nitride
rugate filters grown by plasma-enhanced chemical vapor deposition, 141
Sintering
theoretical model for the analysis of a ceramic thin film sintering on a non-sintering substrate, 109
Sputtering
epitaxial BaF_2 films on InP(100) deposited by r.f. magnetron sputtering, 60
infrared spectroscopic investigations on h-BN and mixed h/c-BN thin films, 50
iron oxide thin film gas sensor, 211
origin of the inhomogeneity of electrical resistivity in magnetron-sputtered indium tin oxide thin films, 152
structure and properties of reactively sputtered γ-Mo_2N hard coatings, 1
Steel
investigation of the film formed in the borate oil immersion test, 83
Stress
cavity model of the indentation hardness of a coated substrate, 122
interface yield map of a hard coating under sliding contact, 115
theoretical model for the analysis of a ceramic thin film sintering on a non-sintering substrate, 109

Structural properties
deposition and properties of cadmium oxide films by activated reactive evaporation, 17
effect of cations on the order of saturated fatty acid monolayers at the air–water interface as determined by infrared reflection–absorption spectrometry, 74
infrared spectroscopic investigations on h-BN and mixed h/c-BN thin films, 50
microcrystalline silicon carbon alloy film prepared by photo-chemical vapour deposition, 249
non-linear optical characterization of Langmuir and Langmuir–Blodgett films of an amphiphilic coordination compound, 202
observation of molecular reorientations in vapor-deposited organic thin films during heat treatment by energy-dispersive total-reflection X-ray diffractometry, 44
peculiarities of the switching process in polycrystalline thin ferroelectric films of PZT type, 157
second harmonic generation from Langmuir–Blodgett monolayers of amphiphilic ruthenium(II) complexes: structural characterization with polarization measurements, 196
structure and properties of reactively sputtered γ-Mo_2N hard coatings, 1
study of structural changes of tellurium thin films on polymer substrates by electrical measurements and transmission electron microscopy, 272
X-ray diffraction studies of the structure of molybdenum sulphide thin films, 255
Sulphides
chemical deposition of PbS from an acidic bath, 7
X-ray diffraction studies of the structure of molybdenum sulphide thin films, 255
Surface and interface states
friction and wear properties of electroless Ni-polytetrafluoroethylene composite coating, 98
interface yield map of a hard coating under sliding contact, 115
Surface composition
investigation of the film formed in the borate oil immersion test, 83
Surface stress
spalling mechanism of Al_2O_3 ceramic coating coated WC–Co substrate under sliding contact, 104
Tellurium
study of structural changes of tellurium thin films on polymer substrates by electrical measurements and transmission electron microscopy, 272
Tin
origin of the inhomogeneity of electrical resistivity in magnetron-sputtered indium tin oxide thin films, 152
Transmission electron microscopy
new amorphous molybdenum oxysulfides obtained in the form of thin films and their characterization by TEM, 34
Tribology
cavity model of the indentation hardness of a coated substrate, 122
interface yield map of a hard coating under sliding contact, 115
spalling mechanism of Al_2O_3 ceramic coating coated WC–Co substrate under sliding contact, 104
Tungsten
highly oriented WSe_2 thin films prepared by selenization of evaporated WO_3, 180
Work function
study of group Ib metal adsorption on iridium, 64
X-ray diffraction
new amorphous molybdenum oxysulfides obtained in the form of thin films and their characterization by TEM, 34
observation of molecular reorientations in vapor-deposited organic thin films during heat treatment by energy-dispersive total-reflection X-ray diffractometry, 44
X-ray diffraction studies of the structure of molybdenum sulphide thin films, 255
X-ray photoelectron spectroscopy
investigation of the film formed in the borate oil immersion test, 83
preparation and *in-situ* characterization of polycarbosilane thin films by d.c. plasma-enhanced deposition, 10
